

Founded in 1955, Physicians Laboratory is a leading independent clinical and anatomic reference laboratory servicing Nebraska and Western Iowa. Physicians Laboratory currently conducts autopsies for 46 counties within the state of Nebraska. Our newly constructed morgue opened in March 18, 2019 in Omaha and we are currently in the planning stages for expanding and building a second morgue in Lincoln. Due to our increasing volumes and continued growth, Physicians Laboratory is currently seeking a full time Forensic Pathologist. Excellent communication skills are required due to the frequent interaction with law enforcement and required court testimony. Salary commensurate with experience.

Duties Include:

- Perform approximately 250 autopsies per year.
- Collection of materials including body fluids, cultures and tissue for diagnosis pertaining to cause of death.
- Provide deposition and/or trial testimony.
- Participate in consultation with Coroner, Law Enforcement and County Attorney staff and other specialists and officials as required by the County.
- Ensure the proper evidentiary and chain of custody rules when handling, labeling, storing and transporting specimens.
- Develop procedures and protocols for the morgue.
- Provide reports and data in a comprehensive format.
- Report to scenes of investigation when requested.

Interested applicants should send their resume to kmoreland@physlab.com
